# DATATAG<sup>TM</sup> PLT Courses

## IMI Accredited Vehicle Examination and Investigation Course

Designed to equip officers with the essential knowledge to complete a comprehensive examination of all manners of vehicles. The course ensures attendees have the vital skills in vehicle construction and dating methods and equips them with the professional judgement to tackle the most complex vehicle examinations.

In addition students will take away the knowledge and understanding to:

- recognise false plates, fake VIN's and false paperwork
- understanding of DVLA methods
- theft techniques
- commonly used tools
- and the complexity of vehicle crime

On completion students will have all the essential skills and qualities required to become a Qualified Stolen Vehicle Examiner (QSVE).

Price Per Student - £599\* + VAT (\*IMI registration additional £74 no VAT)

## IMI Accredited Police Plant Machinery Identification

This two-day course is suitable for complete beginners and those with an intermediate level of knowledge the course provides practical exercises and a number of assessments.

The course will empower officers to locate and assess vehicle identification across both construction and agricultural plant machinery and to then effectively use local and national systems to correctly identify stolen plant machinery.

Students will also gain a comprehensive understanding of the national official scheme, The Construction (& Agricultural) Equipment Security And Registration (CESAR) Scheme. CESAR has marked approximately 650,000 machines since the scheme began in 2007 and Students will learn how to use the Datatag technologies it contains to identify a machine and will also learn all the latest developments to the scheme.

Price Per Student - £599\* + VAT (\*IMI registration additional £74 no VAT)

**Please email our Police Liaison and Training Team on [plt@datatag.co.uk](mailto:plt@datatag.co.uk) for more information or to book your place.**

## IMI Accredited Restoration of Erased Marks Training Course

This 2 day course, limited to 6 attendees, is designed to provide the essential techniques and theories needed in this field. Candidates will develop a deep understanding of both chemical and physical methods for restoring erased marks through hands-on training and will also learn the factors that contribute to the erasure or alteration of identification marks, the common methods employed by criminals to obscure these identifiers, and the various challenges involved in recovering them.

The course also highlights the importance of structured methodical examination, covers report writing, documentation, and use of materials when presented as evidence for court ensuring students recover the data and have an awareness of legal processes to help justify and support their findings in a professional manner.

On successful conclusion candidates will be fully equipped to contribute effectively to investigations involving erased marks, including Vehicle Identification Numbers (VINs), engine numbers and other serialised identifiers.

This course covers both theory and practical sessions and is available for delivery to UK police forces as well as to the broader policing community across the EU.

Course costs £599\* + VAT (\*IMI registration additional £74 no VAT)

## IMI Accredited Caravan and Motorhome Examination and Investigation Course

This 1.5 day course, limited to 12 attendees, covers both theory and practical sessions and has been specifically designed to enhance the skills and knowledge of Police Officers / Staff working towards being a Qualified Stolen Vehicle Examiner (QSVE).

Designed to provide specific training into the techniques to aide investigations and, by close examination and inspection, subsequently identify caravans / motorhomes that have been cloned to fake identities.

Able to be delivered in force in the UK or the wider Policing community in the EU costs £599\* + VAT

(\*IMI registration additional £74 no VAT)

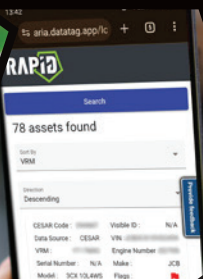

# Need to ID Plant Machinery or Motorcycles fast?

## You need a **RAPiD** check!

**RAPiD** (Registered Assets Police Information Database) is a web based 'app' allowing easy access to the **CESAR Scheme** and **Datatag** databases to quickly check some 650,000 pieces of plant & machinery and over 1 million motorcycles!

**RAPiD** draws information from numerous sources including **PNC/LEDS** and is accessible via **smartphone, tablet, laptop or desktop**.

Run checks using full or partial **VRM**, engine/**VIN** number and various other visible **ID!**

### EASY ID

100's of machine videos help locate chassis & engine numbers!

Scan the QR code and complete the 'Request Access' Registration Form and get **RAPiD** access.
